COMMUNICATIONS - GENERAL INSTRUCTIONS

WRITE - Whenever possible
 Be sure you provide a proper mailing and return address which should include Name, Dept. No., Location, and Extension Number.

WIRE - Whenever necessary
 All wires are transmitted over IBM Private Wire System. Type or print your message. If you are located in Main Plant and not on hourly mail service, you may use the automatic recording service. Dial 85, wait for ringing tone, dial "1" and proceed with your message.
 Include: (1) Your Name, Dept. No., and Phone Ext. (2) Station Code if IBM or Co. name and address (3) Individual Name (4) Message itself (5) Signature

PHONE - Whenever it is imperative

DIRECT LINES
Calls you Dial Direct to IBM locations:
 Many IBM locations can be dialed direct. To prevent unnecessary toll calls to these locations, consult Page 7 of this directory for the listing and dialing procedures.
Calls you Place through IBM Endicott Operator:
 New York City Syracuse (See Page 7)

TOLL CALLS
 All Outgoing Toll Calls - Give your toll billing #2Q2-6XXX
 All Collect and Return Calls - Give your toll billing #2Q2-6XXX
Calls You Can Dial Direct - Station to Station - See Page 5 & 6
Calls You Cannot Dial Direct - You will continue to place the following out of town calls through the Binghamton operator (Dial "9" "0").

Person To Person Collect Calls Conference Calls

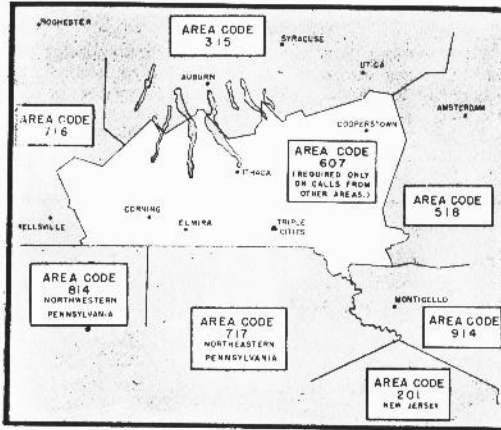

IMPORTANT
To Transfer a Call - If you anticipate your call may have to be transferred, dial "0" and ask for an outside line. Then proceed with your call. Signal operator by moving cradle switch slowly up and down.
If you must leave your phone before any call is completed, inform the operator or leave an alternate number on which you can be reached.
Personal Calls - should not be made except in case of emergency. Use telephone booths provided for this purpose. If a booth is not available, personal toll calls MUST be made through IBM operator.
Conference Connections may be made by the IBM operator for 2 to 5 people.
To Report Telephone Trouble - Dial IBM operator.

AREA CODES

YOUR NUMBERING PLAN AREA

The white section on the map shows the Numbering Plan Area in which you are located. Do not dial an Area Code if you are calling a city or town within your own area. Hundreds of distant points are now dialable. Those most frequently called are listed below. The Binghamton operator will be glad to tell you what other locations can be dialed.

Remember - when making any long distance call be sure to give your correct TOLL BILLING NUMBER, (#2Q2-6XXX).

TOLL CALL PROCEDURE--DIRECT DISTANCE DIALING

Station To Station Calls Only

FIRST----- Consult the list of frequently called places on page 6 of the directory.

- To determine if the place you want to call can be reached by dialing.
- To find the proper AREA CODE (if needed) for the place you want to call.

If the place you want is not listed, dial "9" "0" and ask the Binghamton telephone operator if it is a dialable point.

THEN----- When you have the telephone number

- Listen for dial tone, Dial "9", listen for a second dial tone, then dial 112. (This is a special code which sets up the long distance equipment for the next step of your call.)
- Dial the AREA CODE (if needed) followed by the first two letters and five or six numerals of the number you are calling.

NOTE: If you are dialing a town or city in your own numbering plan area, the area code is not needed.

FINALLY----- Upon completion of dialing, an operator will request your number. Give her the TOLL BILLING NUMBER on your telephone (2Q2-6 XXX) A few seconds after you have announced your number, the telephone you are calling will begin to ring.

IF YOU DON'T KNOW THE TELEPHONE NUMBER--Ask the Binghamton Telephone operator for "information" in the city or town you are going to call. (There is no charge for this service.)

When you are connected with the distant "Information Operator", obtain the telephone number you want. After obtaining the number, record it in your frequently called number list. Then dial the call as instructed above.

IF YOU REACH A WRONG NUMBER--Determine the city you have reached. Hang up, dial the Binghamton telephone operator and tell her in what city the wrong number was reached so we will not be charged for the call.

IF YOU ARE CUT OFF OR IF THERE IS DIFFICULTY IN HEARING--Hang up, dial the Binghamton telephone operator and tell her what has happened so the charge for the call can be properly adjusted.

IF THE NUMBER YOU DIALED IS BUSY OR DOESN'T ANSWER--There is no charge made. Hang up and try again later.

If you wish to leave word or instruct someone to call you, give Pioneer 8-2211 and your extension, NOT YOUR TOLL BILLING NUMBER.

NEW TOLL PROCEDURES

When you receive an incoming Collect Call, if you are authorized to accept the charge, please advise the Long Distance operator to bill the call to your Toll Billing Number (2Q2-6XXX) before you begin conversation.

When placing a call with a Long Distance Operator, use the Area Code, if you know it, in place of the destination name.

e. g. 315 - HA 2-5163, Mr. Rogers - rather than -
Syracuse HA 2-5163, Mr. Rogers

PRIVATE TELEPHONE NETWORK

Private line dial telephone network is a desk-to-desk telephone dialing system. It enables the user to dial a code to other IBM locations followed by the desired extension. It is available on a 24-hour, 7-day a week basis.

It should be used only for important matters requiring voice communication and in which a saving can be realized to IBM. Calls should be made with the same concern for expense you would have for a regular long distance call. Length of conversation should be kept to a minimum.

To use a minimum of circuit time when making a call, it is extremely necessary that the calls be placed by extension number. A "List For Ready Reference" (Page 2) is included in the telephone directory so you may record frequently called numbers. Please do not request other IBM location directories.

If a call back is necessary and you will be out of the office, tell the caller when you expect to return so as to avoid an unnecessary call.

If a trouble is noticed on the line, notify the operator furnishing as much information as possible regarding the nature of the difficulty.
