MEMORANDUM TO: 1461 File

SUBJECT:

Carriage Control Operation Codes .

The four Operation Codes:

- A - Carriage Skip after print
- B - Carriage Skip before print
- F - Carriage Space before print
- Q - Carriage Space after print

will be replaced by a single new operation code:

- F - Forms Control

The complete new instruction appears as follows:

- FD Forms Control per d
- F (III) d Forms Control per d and Transfer Program.

The zone part of the d - character indicates whether the form is to be spaced or skipped, and whether immediately, or delayed until after the next print cycle.

The numeric part of the d - character indicates the channel to which the form is to be skipped, or the number of lines that the form is to be spaced.

The enclosed chart gives the d - character for all forms control functions.
