MEMORANDUM TO: Instructors - 1401 Classes

SUBJECT: Classes

The first series of 1401 Model B classes were such a success and the demand for more of these classes has been so great that we have been asked to run a second series of classes covering the same material.

The timing and conduction of these new classes should follow very closely the original set-up.

The only area that I feel we were a little weak in our first series of classes was the written material that was to be distributed to the students. Make an extra effort to make this material available to the students.
